CALL FOR PROPOSALS

Disruptor Projects

THE UK MOD and French DGA sponsored CW ITP programme is currently seeking proposals for projects to start in May 2022, funding up to 6 month projects.

We welcome innovative and disruptive research proposals, focused on the development of future missile technologies and capabilities.

- CW ITP welcomes proposals from both defence and non-defence organisations. In particular those from SMEs, academic institutions and research centres.
- The main objective of the programme is to mature a portfolio of disruptive technologies which hold the promise of major advances in complex weapon applications.

Submission deadline 4th March 2022

For details of the submission process and for further information please sign up for CW ITP membership via the website:
